

**MANUFACTURING
WORKS**

ALL MANUFACTURERS HAVE A PROCESS. EVERY MANUFACTURER DESERVES TO MAKE THAT PROCESS MORE EFFICIENT.

Does your business adequately identify and minimize waste?

Does your business actively optimize processes, cut costs, and boost innovation?

Both of these things can drastically affect your business—no matter its size—and its bottom line.

LEAN: DELIVERING MORE WITH LESS

This class takes an easy-to-understand approach to the process of implementing LEAN Manufacturing to your business. Increasing flow and decreasing waste will help your organization realize real profitable growth. This class helps individuals understand the basic manufacturing lean principles, how to identify waste, and the tools necessary to improve efficiency.
